

Vinod Kumar Maneti

Dallas, Texas | 214-997-3856 | vinod.maneti@gmail.com

Professional Summary

Software Developer with 5 years of experience designing and developing major components of distributed cloud systems using **Java (Spring Boot, Coral APIs), Kafka, Cassandra, Redis, and AWS**. Skilled in building REST microservices, Kafka-based real time data pipelines, and applying multithreading and parallel processing to deliver performance gains. Proficient with cloud-native services including **AWS Lambda, S3, DynamoDB, SQS, CloudWatch** to deliver scalable, resilient, and secure solutions. Experienced in troubleshooting complex distributed system issues, performance tuning and collaborating in Agile teams to deliver business critical applications.

Work History

Goldman Sachs | Software Developer | Dallas, Texas, USA

10/2025 to Current

- Developed REST microservices using **Java (8/11/17) and Scala** on IntelliJ, integrating with Oracle databases and building distributed **Kafka Streams** data pipelines to ingest real-time financial data into **Cassandra** NoSQL data stores.
- Built **Spring Boot** services interacting through **Apache Kafka** message brokers with **Zookeeper**, implemented Kafka producers to load JSON data into Kafka partitions, and developed multi-module **Maven** projects with hierarchical POM configurations.
- Designed **multithreading and parallel processing** for complex JSON layout generation, improving performance by 90%, and reduced database calls and application latency using **Redis** caching.
- Implemented serverless architecture using **Azure Functions** to reduce infrastructure costs and enhance scalability across distributed financial services.
- Developed **REST API** endpoints for customer savings account workflows and implemented backend functionality using **Spring Boot, Spring MVC, Hibernate, and Spring Security** with comprehensive **JUnit and Mockito** test coverage.
- Participated in all SDLC phases including requirement gathering, analysis, design, coding, testing, and documentation, providing technical leadership across distributed Java applications

Amazon | Software Development Engineer | Austin, Texas, USA

03/2025 to 09/2025

- Designed and implemented **cloud native microservices** with **Java (Spring Boot, Coral APIs)** to support logistics workflows processing 50K+ provider reservations daily.
- Integrated with Sparta (provider reservation system) by developing **gateways and command patterns**, enabling multi-quantity reservations for Shared Mobility Partners (SMPs) and scaling adoption to 10+ provider markets.
- Enhanced Flex Offer Service **APIs** to support quantity-based interactions, reducing reconciliation errors by 35% and ensuring accurate confirmation of 10K+ SMP offers per day.
- Partnered with data model owners to introduce capacity Type and quantity fields in **DynamoDB** schemas and Flex scheduling services, ensuring 100% backward compatibility while unlocking multi provider scaling.
- Automated **CI/CD pipelines** using **Jenkins, AWS Code Pipeline, and GitHub**, cutting deployment times by 40% and reducing production rollback incidents by 25%.
- Resolved 10+ on-call incidents related to infrastructure, upstream/downstream dependencies, and **SAS** risks, improving SLA adherence to 99.9% and reducing mean time to resolution (MTTR) by 20%.
- Developed **CloudWatch dashboards**, custom metrics, and alarms for operational excellence, increasing proactive detection of system issues by 30% and reducing customer impacting incidents.
- Actively participated in requirements, design, and TDD based development, improving defect detection preproduction by 25% and accelerating sprint delivery velocity.
- Collaborated with cross functional teams to deliver Project Shepherd (FOMO) features for SMP providers, enabling multi quantity acceptance workflows and expanding offer execution strategies to support 10K+ additional weekly transactions

KFin Technologies Ltd | Software Engineer | Hyderabad, India

01/2022 to 07/2022

- Led the front-end development of the KBOLT application, utilizing **HTML, CSS, TypeScript, and Angular**, which improved application load time by 30% and enhanced user experience for over 10,000 users.
- Developed robust backend solutions using **Java, Spring Boot, and MySQL**, optimizing data workflows and enhancing financial transaction processing speed by 25%.
- Automated critical financial processes, such as SIPs, SWPs, and STPs, reducing manual processing time by 50% and increased operational efficiency 40%.
- Led the development of transaction management systems for Redemption and Switch operations, managing over \$100 million in transactions yearly.
- Collaborated with cross-functional teams to align technical development with business objectives, contributing to a 20% increase in customer satisfaction as measured by NPS.
- Directed rigorous testing and quality assurance, ensuring the application maintained 99.9% uptime and received a user satisfaction score of 95%.
- Delivered 50+ **frontend components** and 20+ financial reports ahead of schedule, adhering to design specifications and contributing to a 15% increase in project delivery efficiency.
- Developed **schedulers** for automated report distribution, which reduced the time to disseminate information to end-users by 70%.
- Enhanced **SQL procedures with XML integration**, which led to a 30% reduction in data retrieval times and a 20% improvement in the responsiveness of user interfaces.

KFin Technologies Ltd | Executive | Hyderabad, India

05/2019 to 01/2022

- Contributed to the development of schedulers for automated report generation, which reduced report generation time by 35% and increased the timely delivery of reports to end-users by 50%.
- Led full-stack development of web applications using Java, Spring Boot, .Net, and MySQL, delivering 3 large-scale projects that enhanced system scalability and improved user satisfaction by 25%.

- Improved software quality by conducting thorough **code reviews**, resulting in a 30% reduction in post-deployment bugs and a 40% increase in code efficiency.
- Contributed to **Frontend and SQL Development**, providing **RDL Support** and delivering 15+ user interface screens that met project specifications and contributed to a 20% increase in application functionality.
- Collaborated with cross-functional teams to gather requirements and translate them into technical specifications, which improved project requirement accuracy by 40% and fostered a 15% improvement in cross department communication.

KFin Technologies Ltd | Executive Trainee | Hyderabad, India

01/2019 to 03/2019

- Maintained comprehensive code documentation for over 50,000 lines of code, facilitating a 25% decrease in onboarding time for new developers and enhancing code maintainability.
- Facilitated weekly code reviews for 10 developers, achieving a 20% code quality improvement and 15% reduction in post deployment bugs
- Delivered 40+ **UI screens** that perfectly matched design specifications, contributing to a 95% approval rate on first review and ensuring 100% compliance with company **UX standards**.
- Developed 30+ SSRS reports, effectively reducing data retrieval time by 40% and ensuring report availability with 99.8% uptime on designated servers.

Technical Skills

Programming Languages:	Java (8,11,17), Scala, JavaScript, Python, SQL, Object-Oriented Programming
Frameworks & Backend:	Spring Boot, Coral APIs, Spring Security, Spring MVC, Microservices Architecture
Frontend & Web:	Angular, React, HTML5, CSS3, XML, Responsive Design, Bootstrap
Messaging & Streaming:	Apache Kafka, Kafka Streams, Zookeeper, AWS SQS, AWS SNS, event-driven architecture
Databases:	DynamoDB, MySQL, Microsoft SQL Server, PostgreSQL, Oracle (PL/SQL), Redis
Cloud Technologies:	AWS (Lambda, S3, DynamoDB, SQS, SNS, IAM, CloudWatch, CloudFormation, CDK, Fargate)
Devops:	Docker, Jenkins, GitHub Actions, CI/CD Pipelines, Maven, Gradle
Monitoring & Observability:	AWS CloudWatch (dashboards, alarms, custom metrics), Grafana, Splunk, Dynatrace
GenAI & AI Tools:	AWS Bedrock, RAG pipelines, LangChain, OpenAI GPT-4, GitHub Copilot, Cline, Claude Code
Reporting & Analytics:	SSRS, Power BI, Tableau, Report Builder 3.0
Version Control & Tools:	Git, Team Foundation Server (TFS), JIRA, Agile/Scrum, Test-Driven Development (TDD)
Testing & QA:	JUnit, Mockito, Jasmine, Karma, Selenium, Cucumber (BDD), Postman
Operating Systems & IDEs:	Windows, macOS, IntelliJ IDEA, Visual Studio Code, SQL Server Management Studio

Education

Master of Science (Masters) – Advanced Data Analytics University of North Texas - Denton, TX	08/2022 to 05/2024
Bachelor of Technology (Bachelors) – Computer Science Mahatma Gandhi Institute of Technology - Hyderabad, India	08/2015 to 04/2019

Projects

Goldman Sachs – Real-Time Kafka Data Pipeline | Java, Scala, Spring Boot, Kafka, Cassandra, Redis 10/2025 to Current

*Designed and built distributed Java and Scala Kafka Streams data pipelines ingesting real-time financial data into Cassandra NoSQL data stores. Implemented multithreading and parallel processing improving performance by 90%, and reduced application latency with Redis caching. Built Spring Boot services with Kafka, Zookeeper, and serverless Azure Functions integrations

Amazon Flex – Delivery Partner Platform (SMP Integration) | Java, Spring Boot, Coral APIs, DynamoDB, AWS Present

*The Amazon Flex app is a mobile platform used by independent delivery partners to schedule, accept, and complete delivery offers. I contributed to enhancing scheduling workflows and integrating Sparta provider reservations to support multi quantity acceptance for Shared Mobility Partners (SMPs), enabling 10K+ daily reservations, improving capacity utilization by 30%, and ensuring 99.9% SLA adherence through AWS based monitoring and CI/CD automation.

KBOLT Project (Maker Level) | HTML, CSS, NodeJS, TypeScript, C#, JavaScript, Angular, MySQL, .NET 05/2019 to 07/2022

*Developed features for KBOLT, an online transaction system for ISC operations, improving mutual fund applications, account statements, and investor data management. Built Angular UI components (Reactive Forms, Kendo grids, dropdowns) with two-way binding, directives, and event handling, integrating XML/DB-driven data via services and RxJS for real-time updates, which enhanced responsiveness and user experience.

TASK MF (Checker Level) | HTML, CSS, Angular, C#, .NET, MySQL 12/2021 to 07/2022

*Designed TASK MF, a secure and scalable platform supporting mutual funds, ETFs, pensions, and equities. Enhanced checker workflows with Angular validation logic, Reactive Forms, and RxJS data streams, while optimizing SQL procedures to improve validation and data retrieval speed by 30%.

GenAI Chat Application with RAG | Python, LangChain, AWS Bedrock, AWS OpenSearch, FAISS Personal

*Developed a Generative AI-based chat application using multi-agent frameworks, RAG techniques, and AWS Bedrock knowledge bases with AWS OpenSearch as the vector store. Enabled intelligent contextual data querying and improved system efficiency within existing AWS environments.
